

Voter-Pulse

Complete User Guide

A step-by-step visual walkthrough of Party Management, Survey Management, and the complete voting workflow — including email OTP verification.

Party Management

Survey Management

Vote Management & Analytics

01

Party Management

Create & manage political parties with logos, leaders, and custom colours.

02

Survey Management

Create, publish, and share election surveys with a unique voting URL.

03

Vote Management

Cast votes with OTP verification and monitor live results on the dashboard.

01

MODULE 1

Party Management

Register political parties before creating surveys. Parties are private to your account — only you can view or modify them.

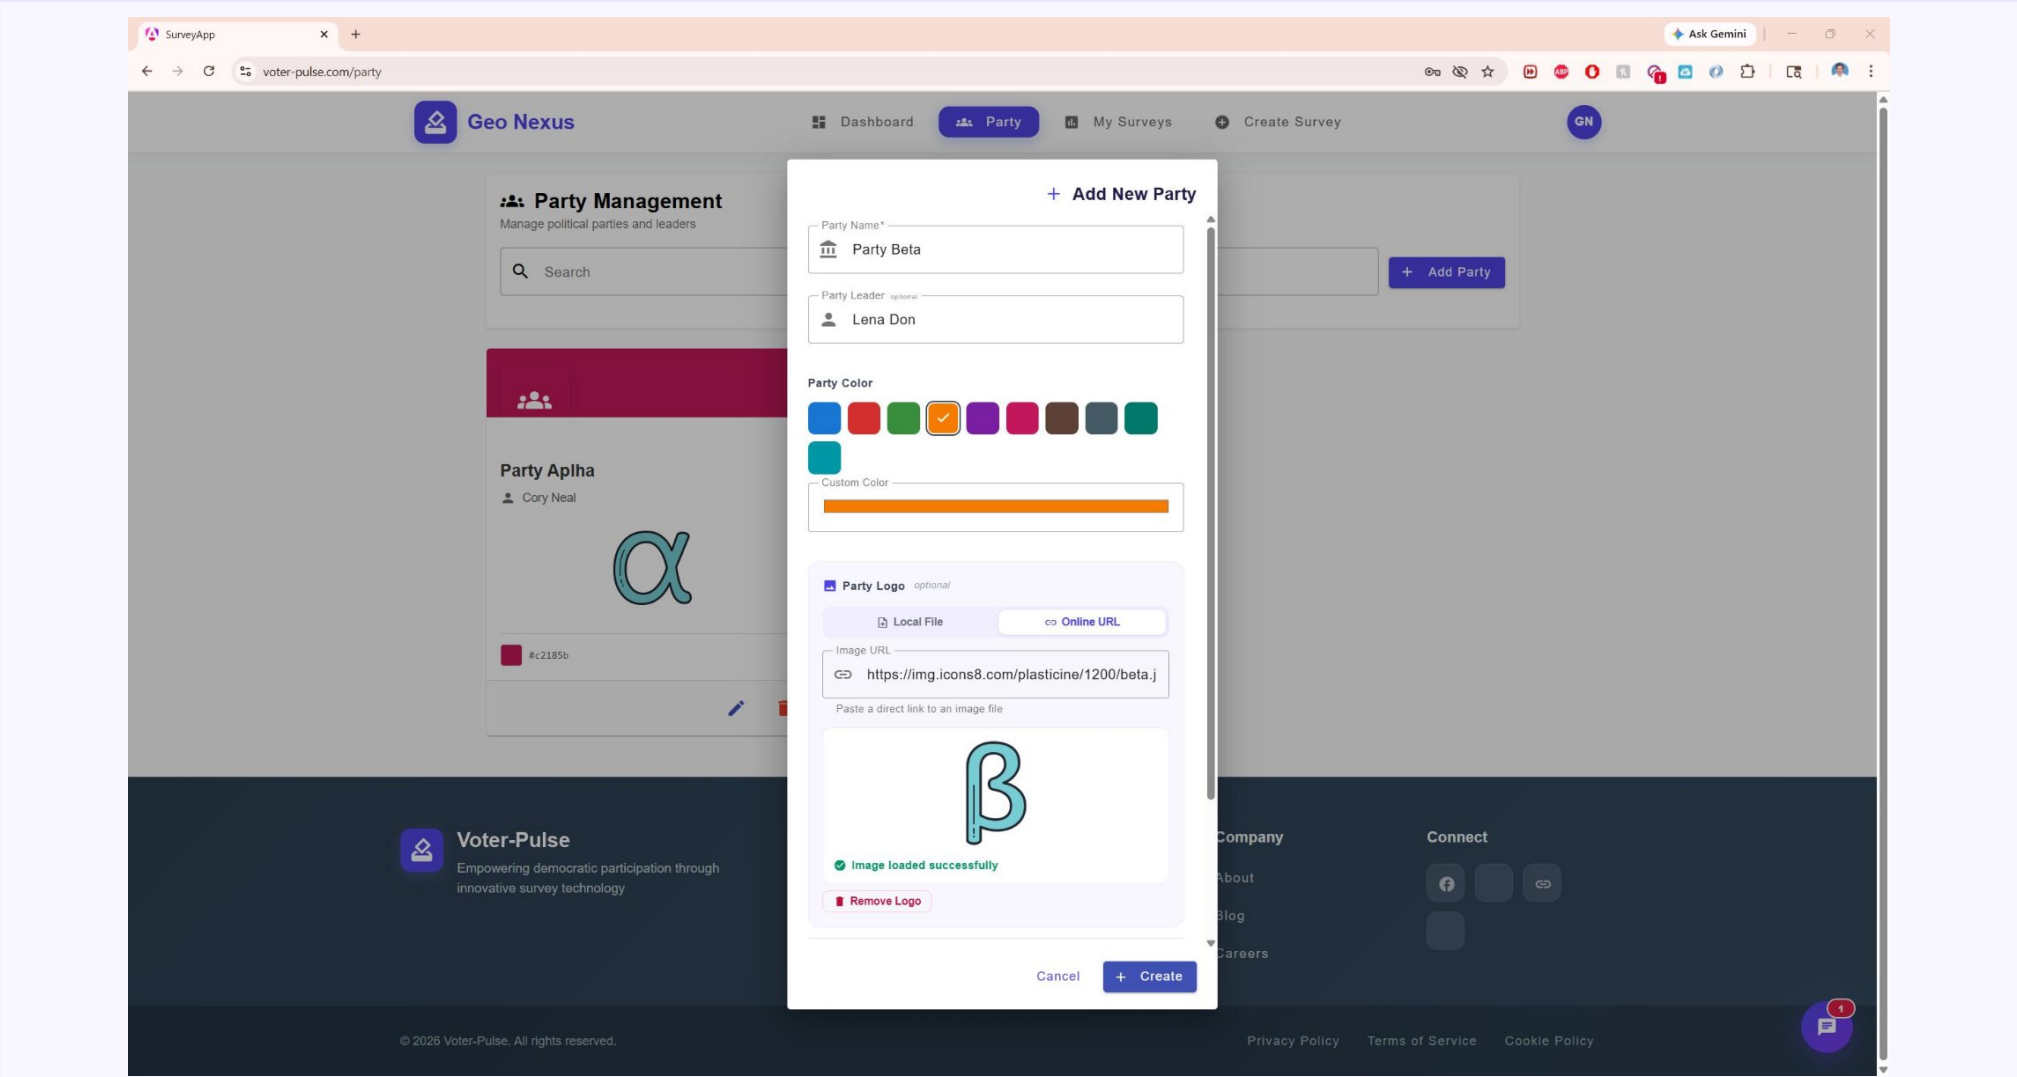

STEP 1

Create a New Party

Navigate to **Party** in the top nav and click **+ Add Party**. A dialog appears with the following fields:

- **Party Name** — Official name of the party (required).
- **Party Leader** — Designated leader's name (optional but recommended).
- **Party Colour** — Choose from the palette or enter a custom hex code. Used in all charts.
- **Party Logo** — Upload via Local File (drag-and-drop, max 2 MB), Online URL, or Google Drive link.

A live preview confirms the logo loaded successfully before saving. A green "Image loaded successfully" message appears beneath the preview.

Add New Party dialog — enter party name, leader, colour, and logo

01

MODULE 1

Party Management

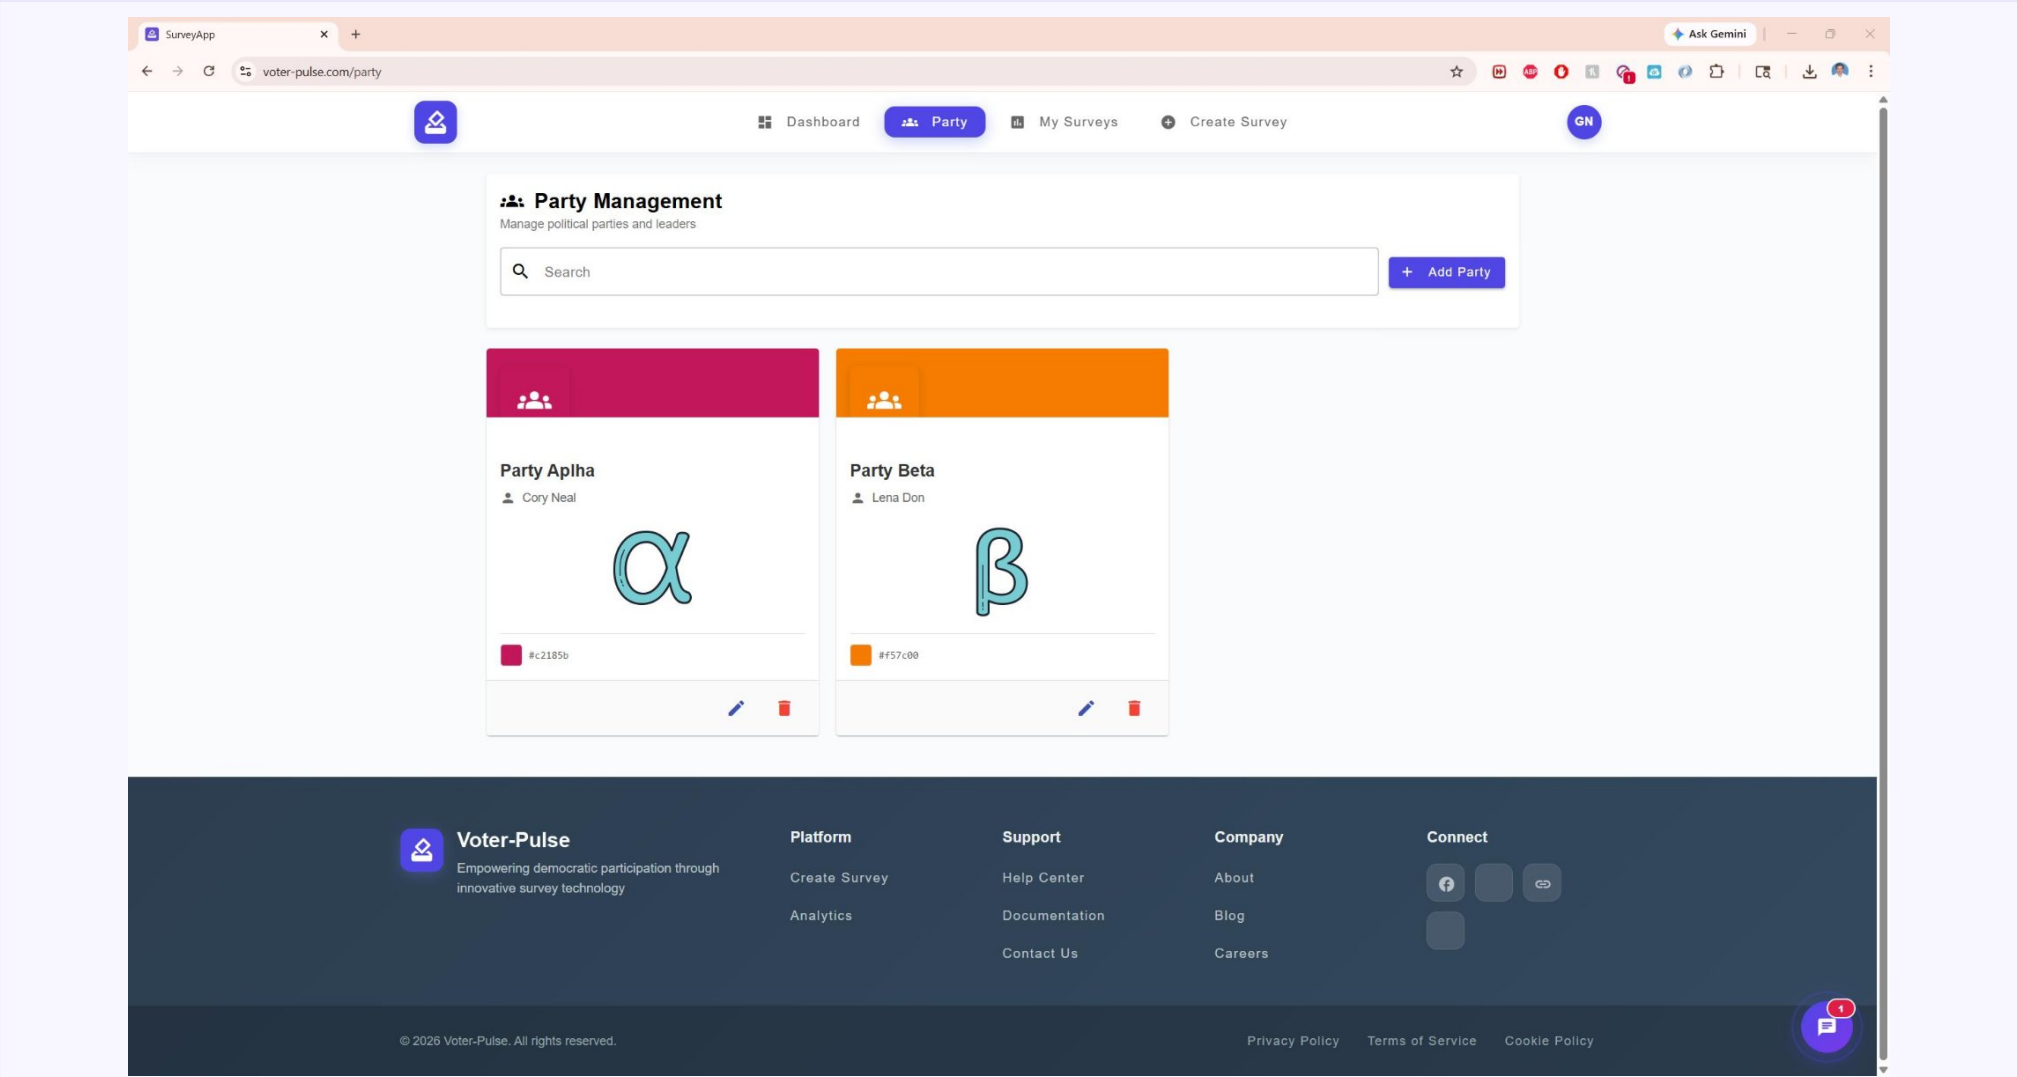

Review and manage your registered parties from the Party Management page.

STEP 2

View and Manage Your Parties

After saving, the party appears as a colour-coded card. Each card shows the party name, leader, and logo. Use the icons at the bottom of each card to:

- **Edit (pencil icon)** — Modify name, leader, colour, or logo at any time.
- **Delete (bin icon)** — Permanently remove the party from your registry.

Party Management page — registered parties displayed as colour-coded cards with edit and delete options

02

MODULE 2

Survey Management

Create, configure, and publish election surveys. Only authenticated users can create surveys. A survey must be published before the public can vote.

STEP 1

Create a New Election Survey

Click **Create Survey** in the top navigation. Complete all required fields:

- **Survey Name** — A clear, descriptive title (e.g., "State Election Survey 2026").
- **Description** — Optional context shown to participants on the voting page.
- **Start & End Date** — Defines the active voting window. Votes are only accepted within this period.
- **Anonymous Survey** — Keeps voter identities private; only aggregate results are visible to the organiser.
- **Select Parties** — Choose at least 2 parties from your registry. Selected parties appear as colour chips below.

The screenshot displays the 'Create New Election Survey' form within the Voter-Pulse SurveyApp. The browser address bar shows 'voter-pulse.com/survey/create'. The app's navigation bar includes 'Dashboard', 'Party', 'My Surveys', and a 'Create Survey' button. The user's profile 'GN' is visible in the top right.

Survey Name*
State Election survey 2026

Description (Optional)
State Election survey 2026

Start Date* 4/1/2026 End Date* 4/30/2026

☒ Anonymous Survey (Voter information kept private)

Select Parties
Choose at least 2 parties for your survey

Party Alpha (selected) Party Beta (selected)
Party Delta (selected) Party Gamma (selected)

Selected Parties (4)
Party Beta Party Alpha Party Delta Party Gamma

Cancel Create Survey

The footer of the app shows 'Voter-Pulse', 'Platform', 'Support', 'Company', and 'Connect' links, along with a chat icon in the bottom right corner.

Create New Election Survey form — fill in details and select competing parties

02

MODULE 2

Survey Management

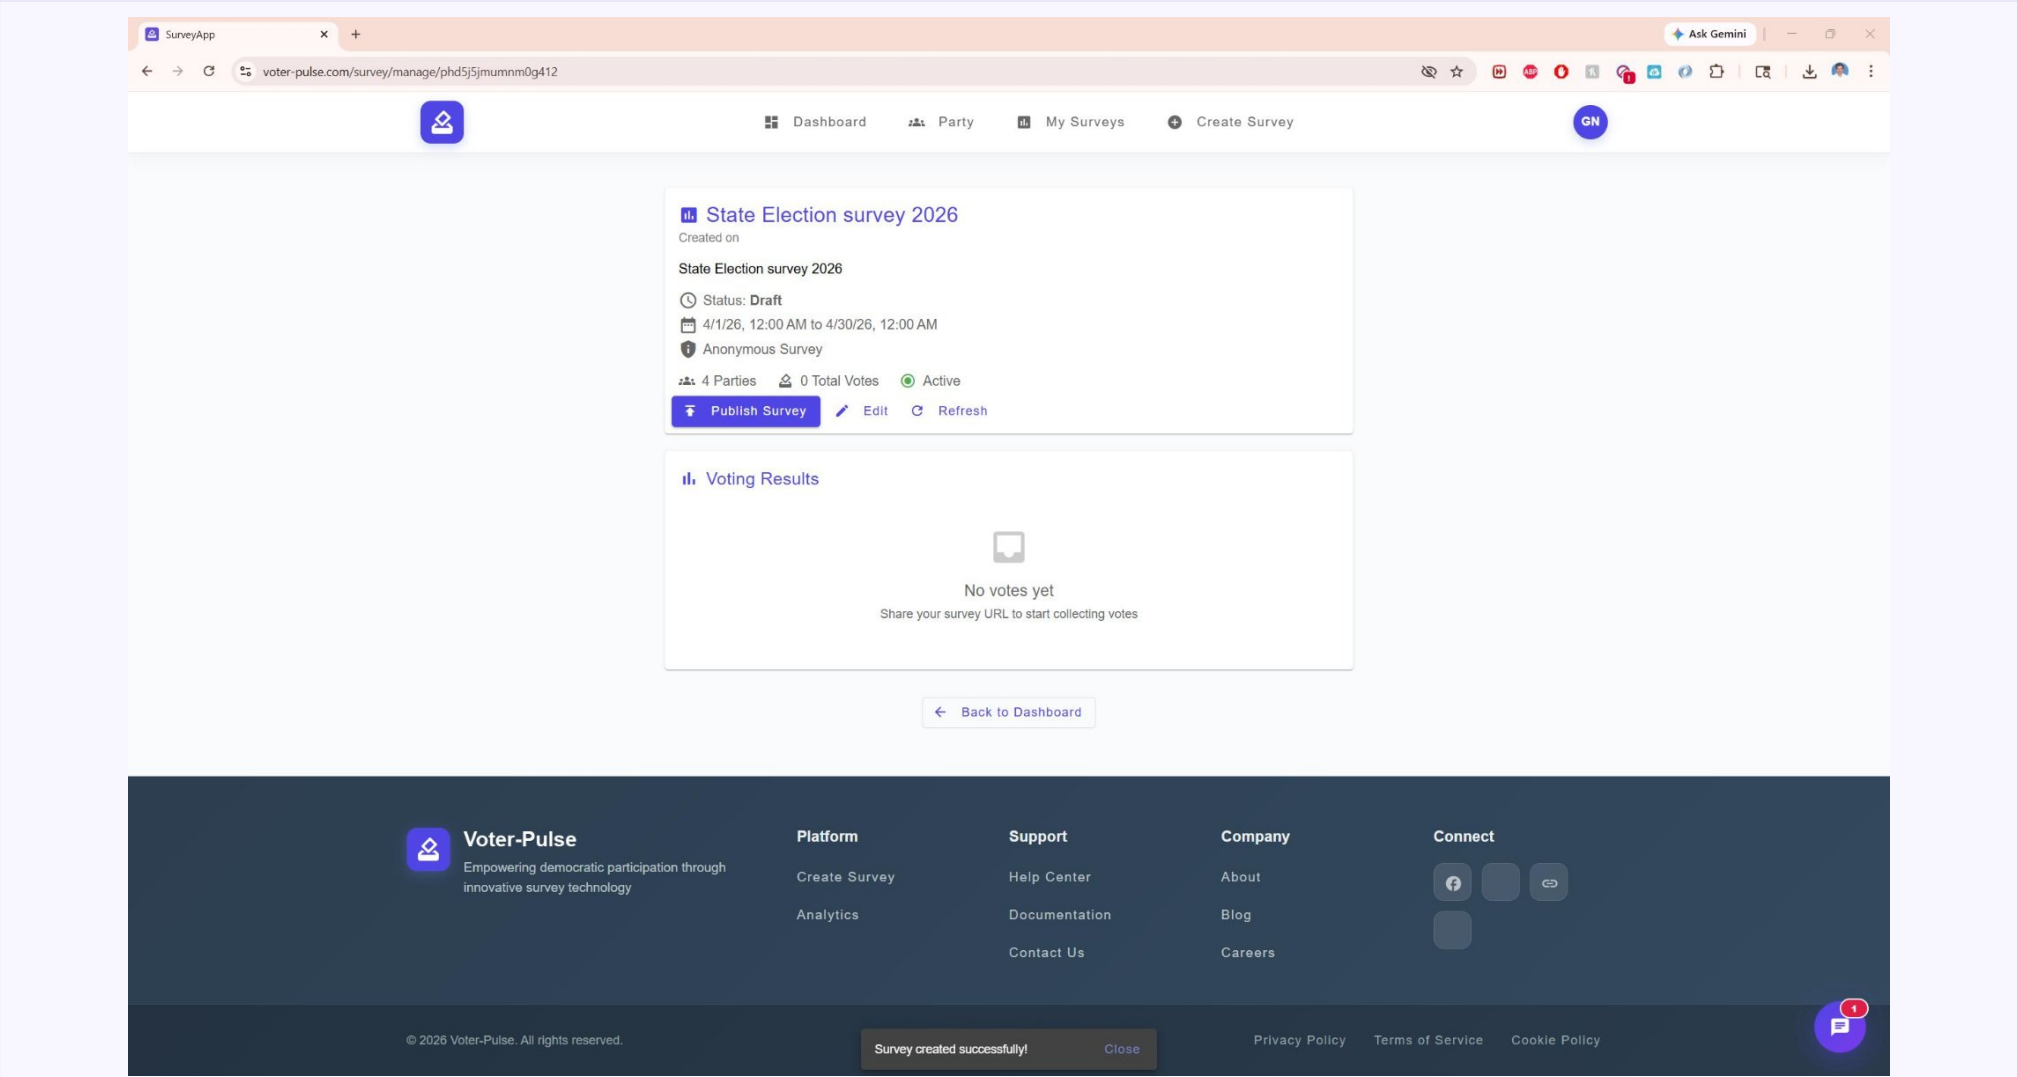

Once created, the survey enters Draft mode and you are redirected to the Survey Detail page.

STEP 2

Review Your Survey in Draft Mode

In **Draft** status, the survey is not publicly accessible and no votes can be cast. All fields remain fully editable via the **Edit** button. When you are satisfied, click **Publish Survey** to make it live.

WARNING: Once published, the party list and core settings are locked and cannot be changed. Review all details carefully before publishing.

Survey detail page in Draft mode — review details, then click Publish Survey or Edit

02

MODULE 2

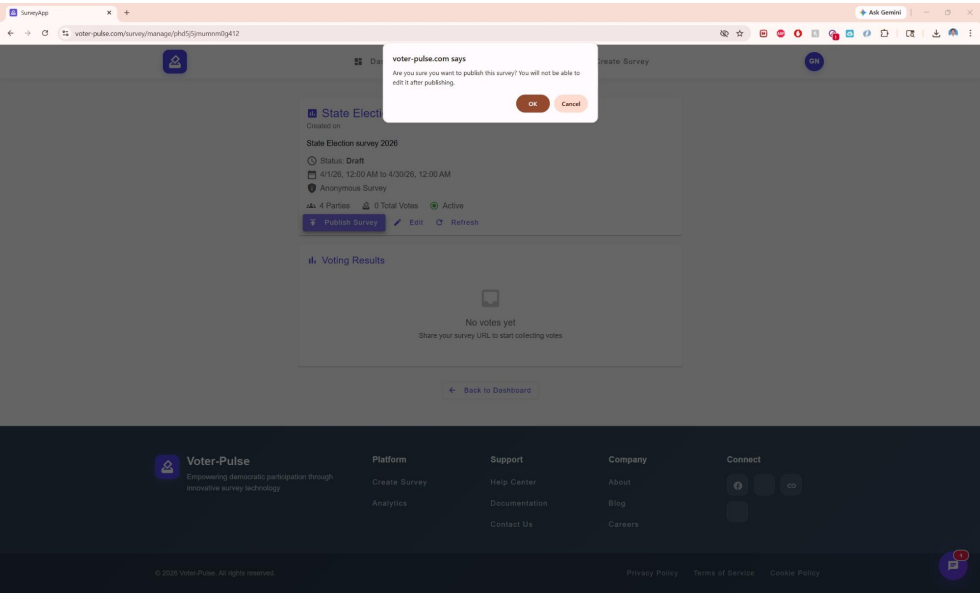

Survey Management

Publishing the survey makes it live and generates a unique, shareable voting URL.

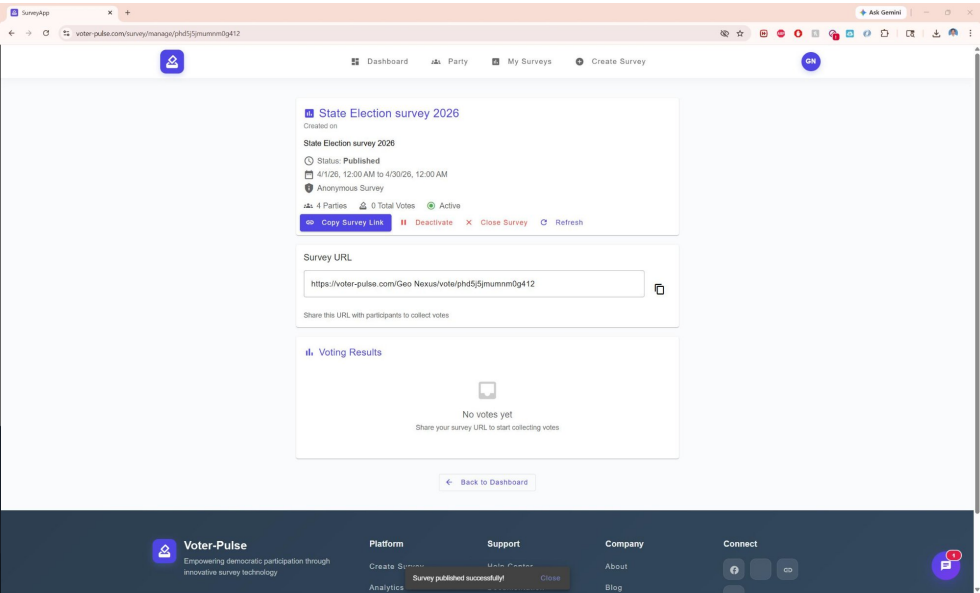

STEP 3

Publish the Survey

Clicking **Publish Survey** triggers a confirmation dialog. Click **OK** to confirm. The system immediately sets the status to **Published**, generates a unique survey URL, and enables public voting. The action bar updates with Copy Link, Deactivate, and Close controls.

Step 1 — Confirmation dialog appears before publishing

Step 2 — Survey published with unique URL generated

02

MODULE 2

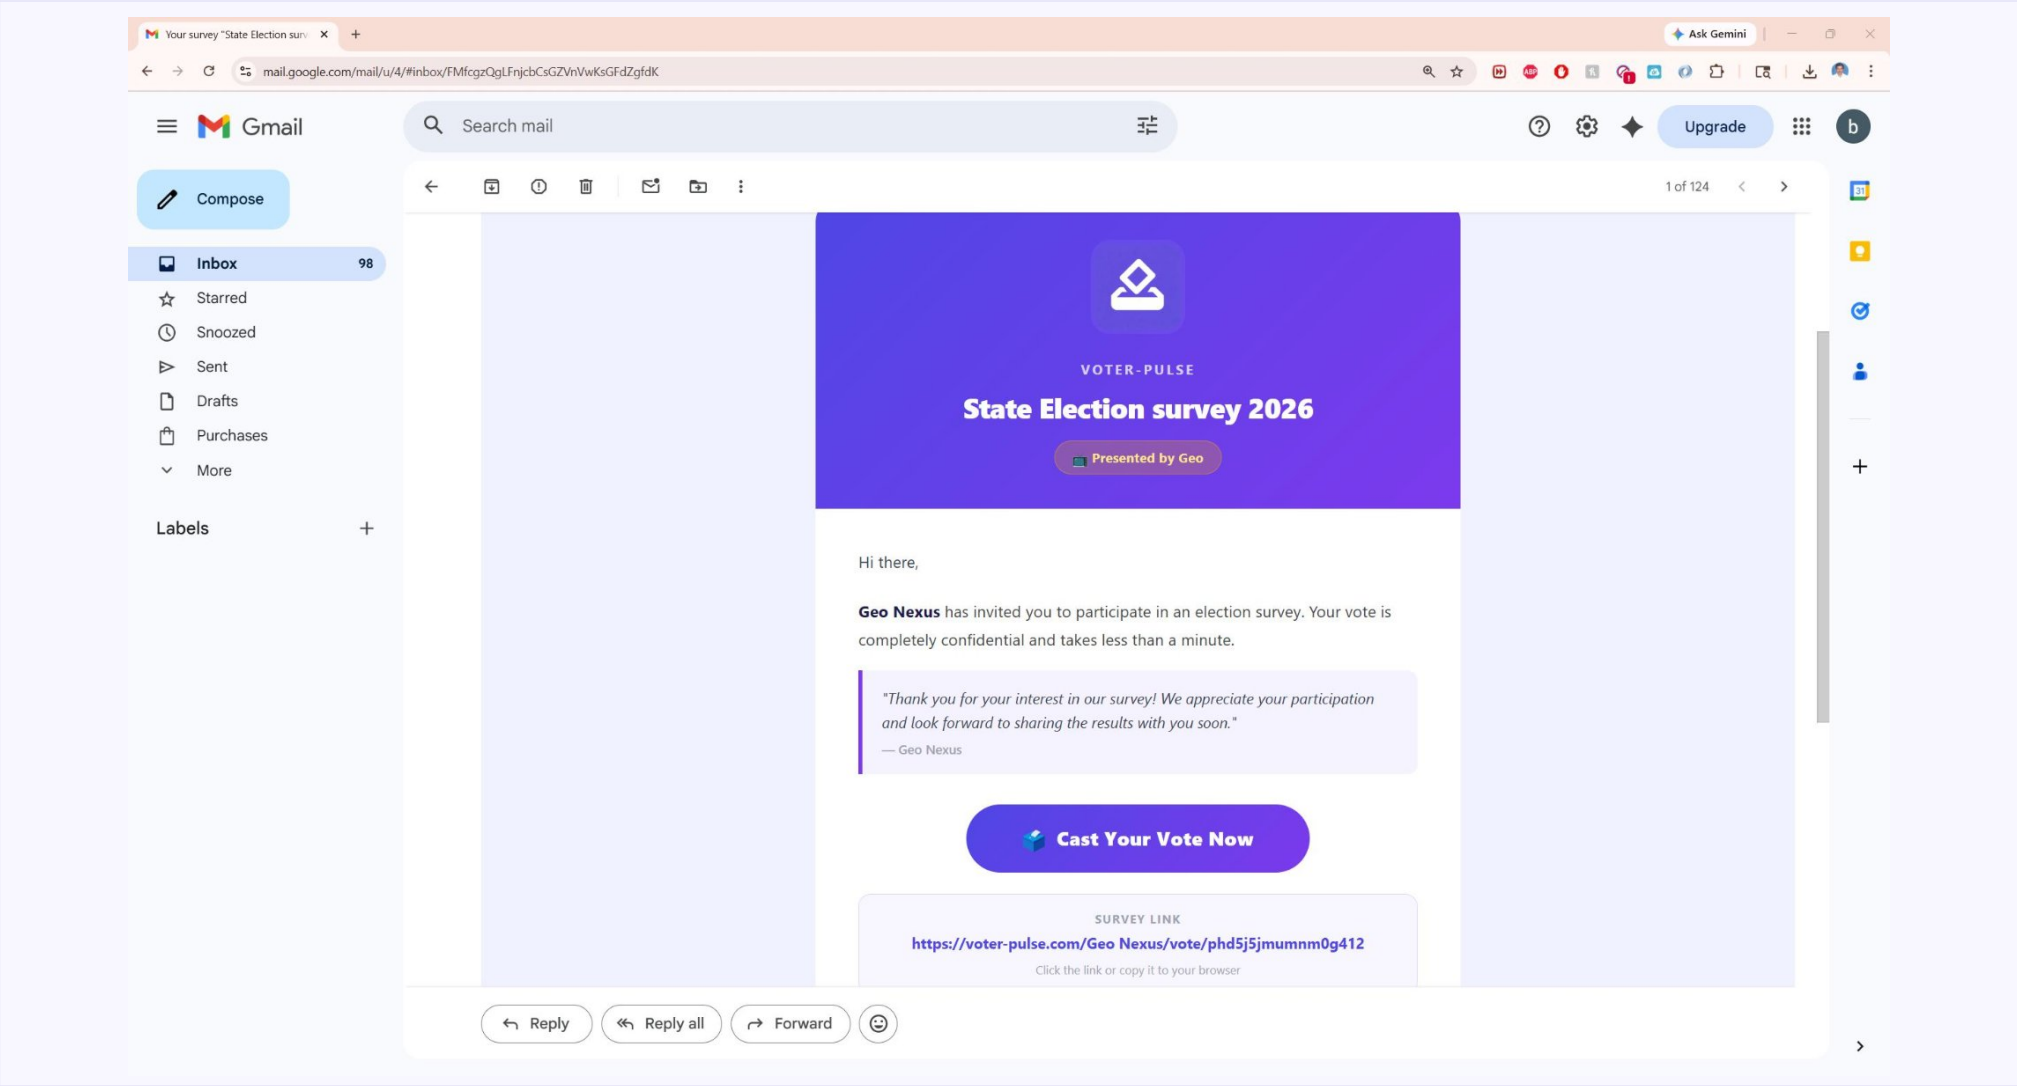

Survey Management

Share the generated survey link with your audience via email, WhatsApp, or social media.

STEP 4

Share the Survey Invitation

Upon publication, the platform automatically dispatches a formatted invitation email containing the survey title, a prominent **Cast Your Vote Now** CTA button, and the full survey URL. You can also copy the URL manually from the Survey Detail page and share it across WhatsApp, social media, or any messaging platform.

Invitation email delivered to participants — includes Cast Your Vote Now button and the survey URL

03

MODULE 3

Vote Management

Voters participate anonymously using their email address. A 6-digit OTP verifies each vote. One vote per email per survey is strictly enforced.

STEP 1

Access the Voting Page

When a participant opens the survey link, the **Voting Page** is displayed. No account or login is required. Participants complete:

- **Email Address** (required) — Used only to send the OTP. Not linked to identity in anonymous surveys.
- **Demographic Information** (optional) — Gender, age, and location for analytical insights.
- **Party Selection** — Choose the preferred party. A preview card confirms the choice before submission.

The screenshot shows a web browser window with the URL `https://voter-pulse.com/Geo%20Nexus/vote/phd5j5jmmnm0g412`. The browser's address bar and tabs are visible at the top. The page content is a survey titled "State Election survey 2026".

State Election survey 2026
State Election survey 2026

Your Email Address*
votertest@gmail.com

Demographic Information (Optional)
Help us understand voting patterns better

Gender
Male

Age
42

Location
New York

Choose Your Preferred Party
Select the party you want to vote for

- ☐  **Party Alpha**
Cory Neal
- ☒  **Party Gamma**
Helen
- ☐  **Party Delta**
- ☐  **Party Beta**
Lena Don

YOUR VOTE
 **Party Gamma**

A chat bubble icon with a red notification badge containing the number "1" is located in the bottom right corner of the page.

Voting page — accessible to the public without login; enter email, demographics, and preferred party

03

MODULE 3

Vote Management

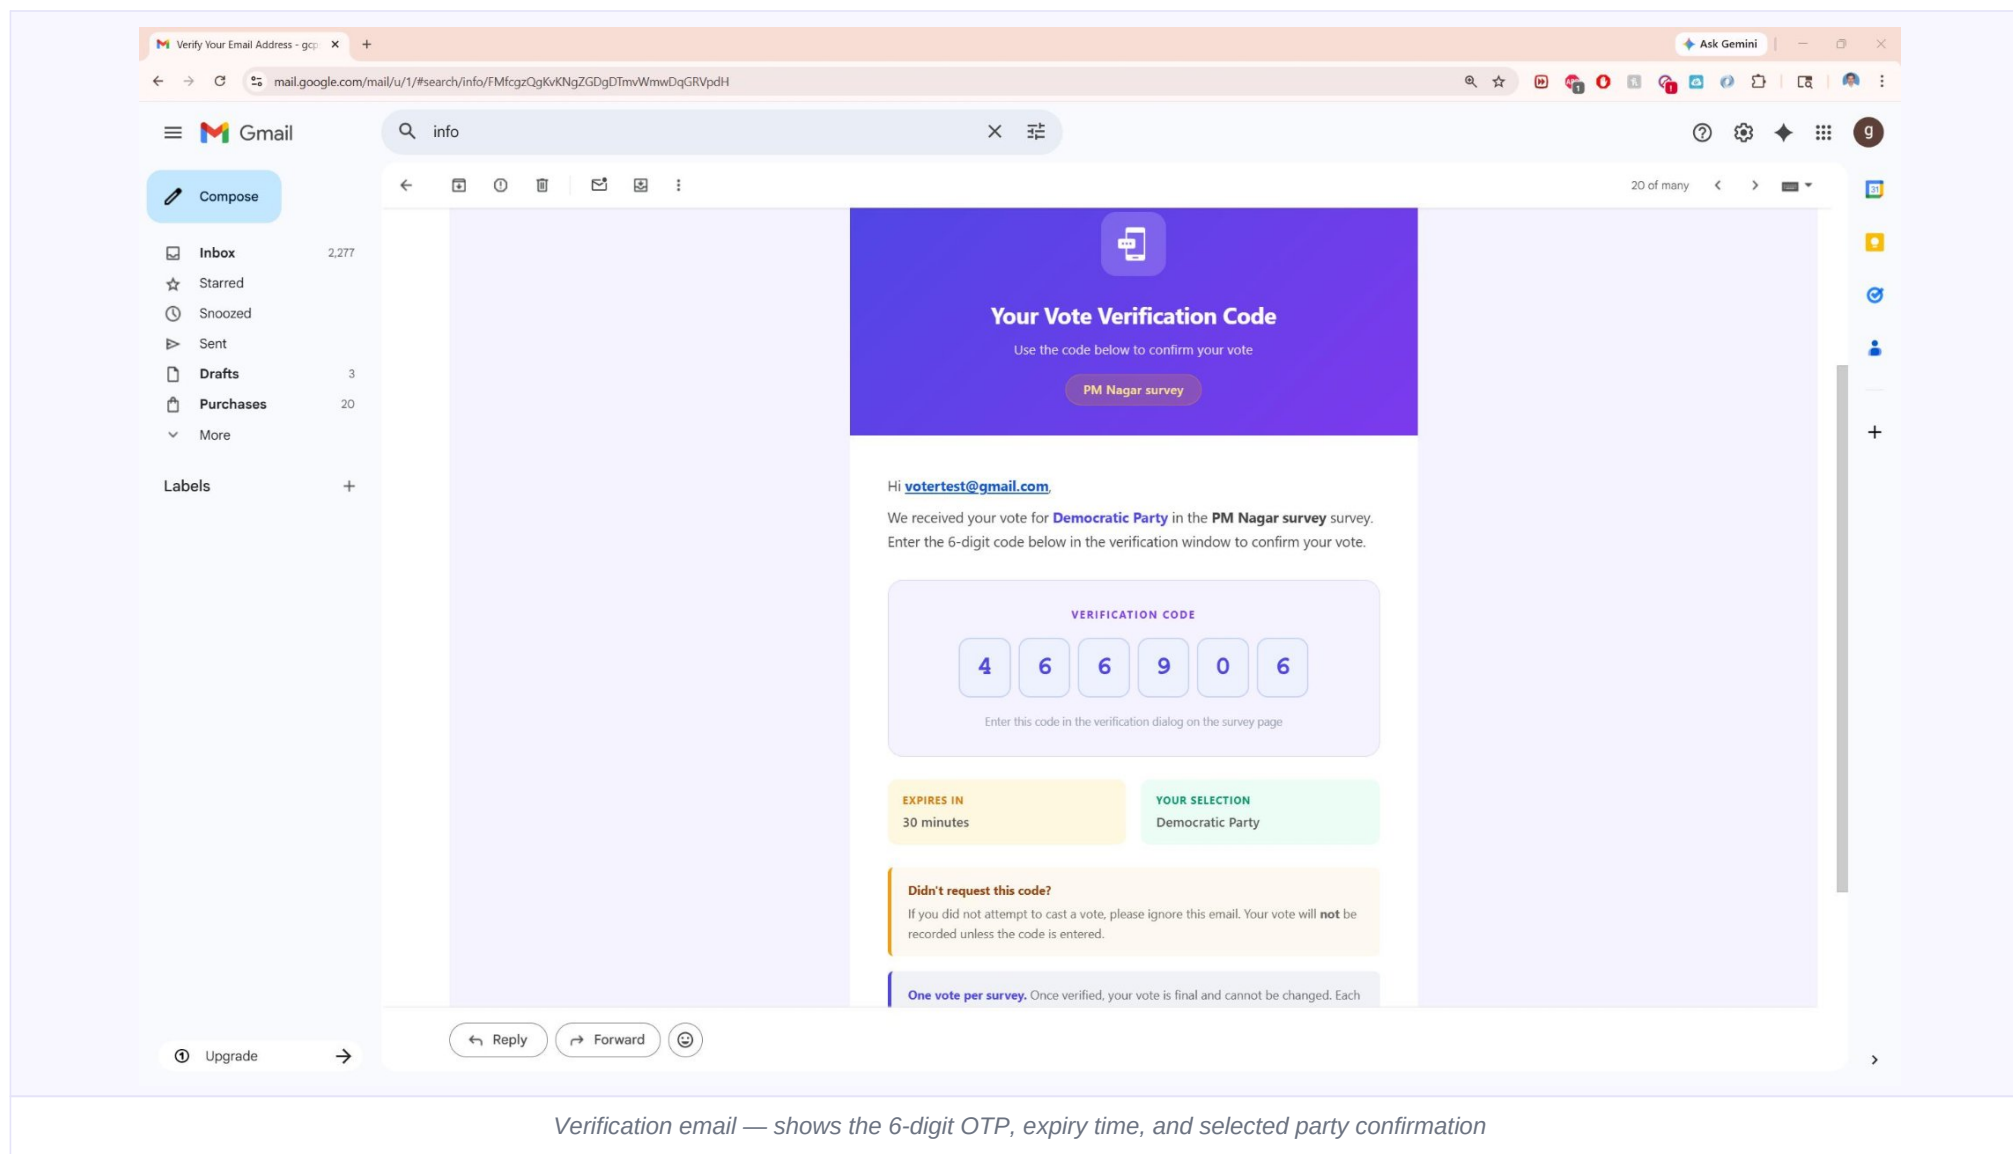

After submitting, a 6-digit One-Time Password is sent to the voter's email for verification.

STEP 2

Receive the One-Time Verification Code (OTP)

The system sends a **6-digit OTP** to the participant's email address. The email clearly displays the individual-digit code, the 5-minute expiry window, and a summary of the selected party — confirming which vote will be recorded.

If you did not attempt to vote, simply ignore the email. Your vote will NOT be recorded unless the code is entered and submitted.

03

MODULE 3

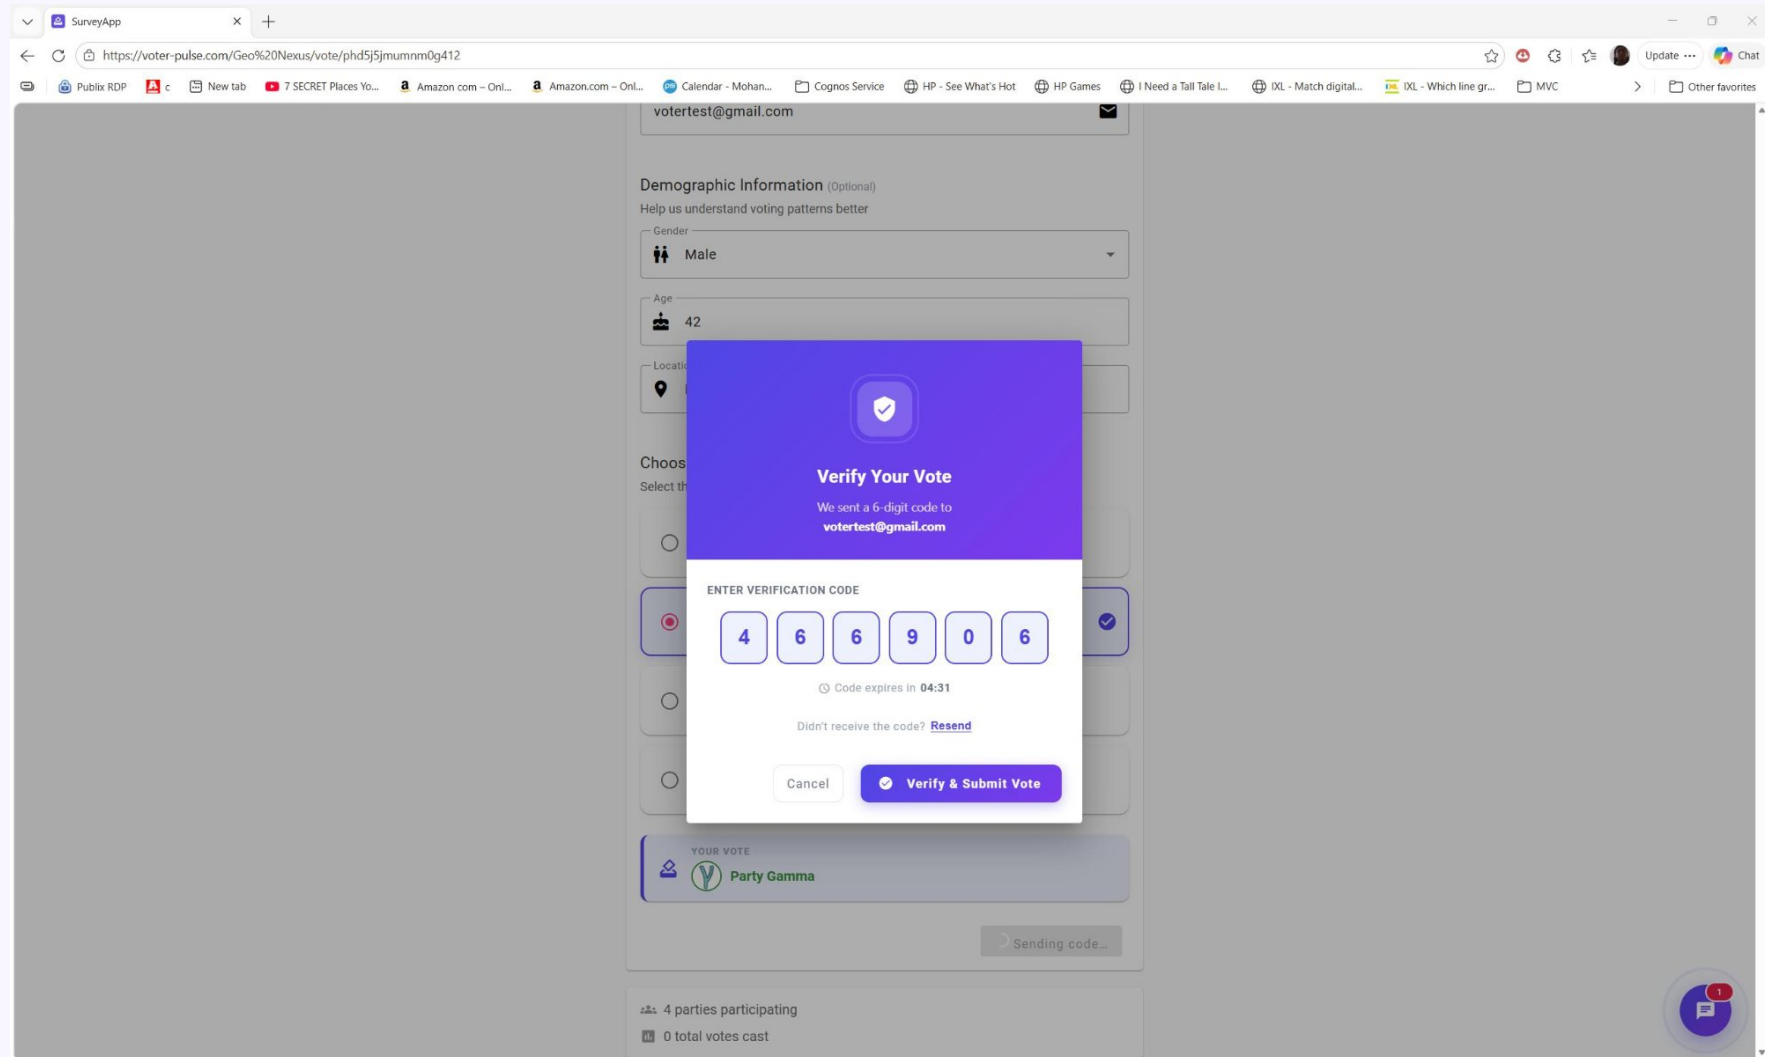

Vote Management

Return to the survey page and enter the OTP code in the verification dialog to confirm your vote.

STEP 3

Enter the OTP and Confirm Your Vote

The **OTP verification dialog** is displayed on the survey page. Enter the 6-digit code — the cursor auto-advances between boxes. A live countdown shows remaining validity. Click **Verify & Submit Vote** to permanently record your vote. This action cannot be undone.

OTP verification dialog — enter the 6-digit code and click Verify & Submit Vote to confirm

03

MODULE 3

Vote Management

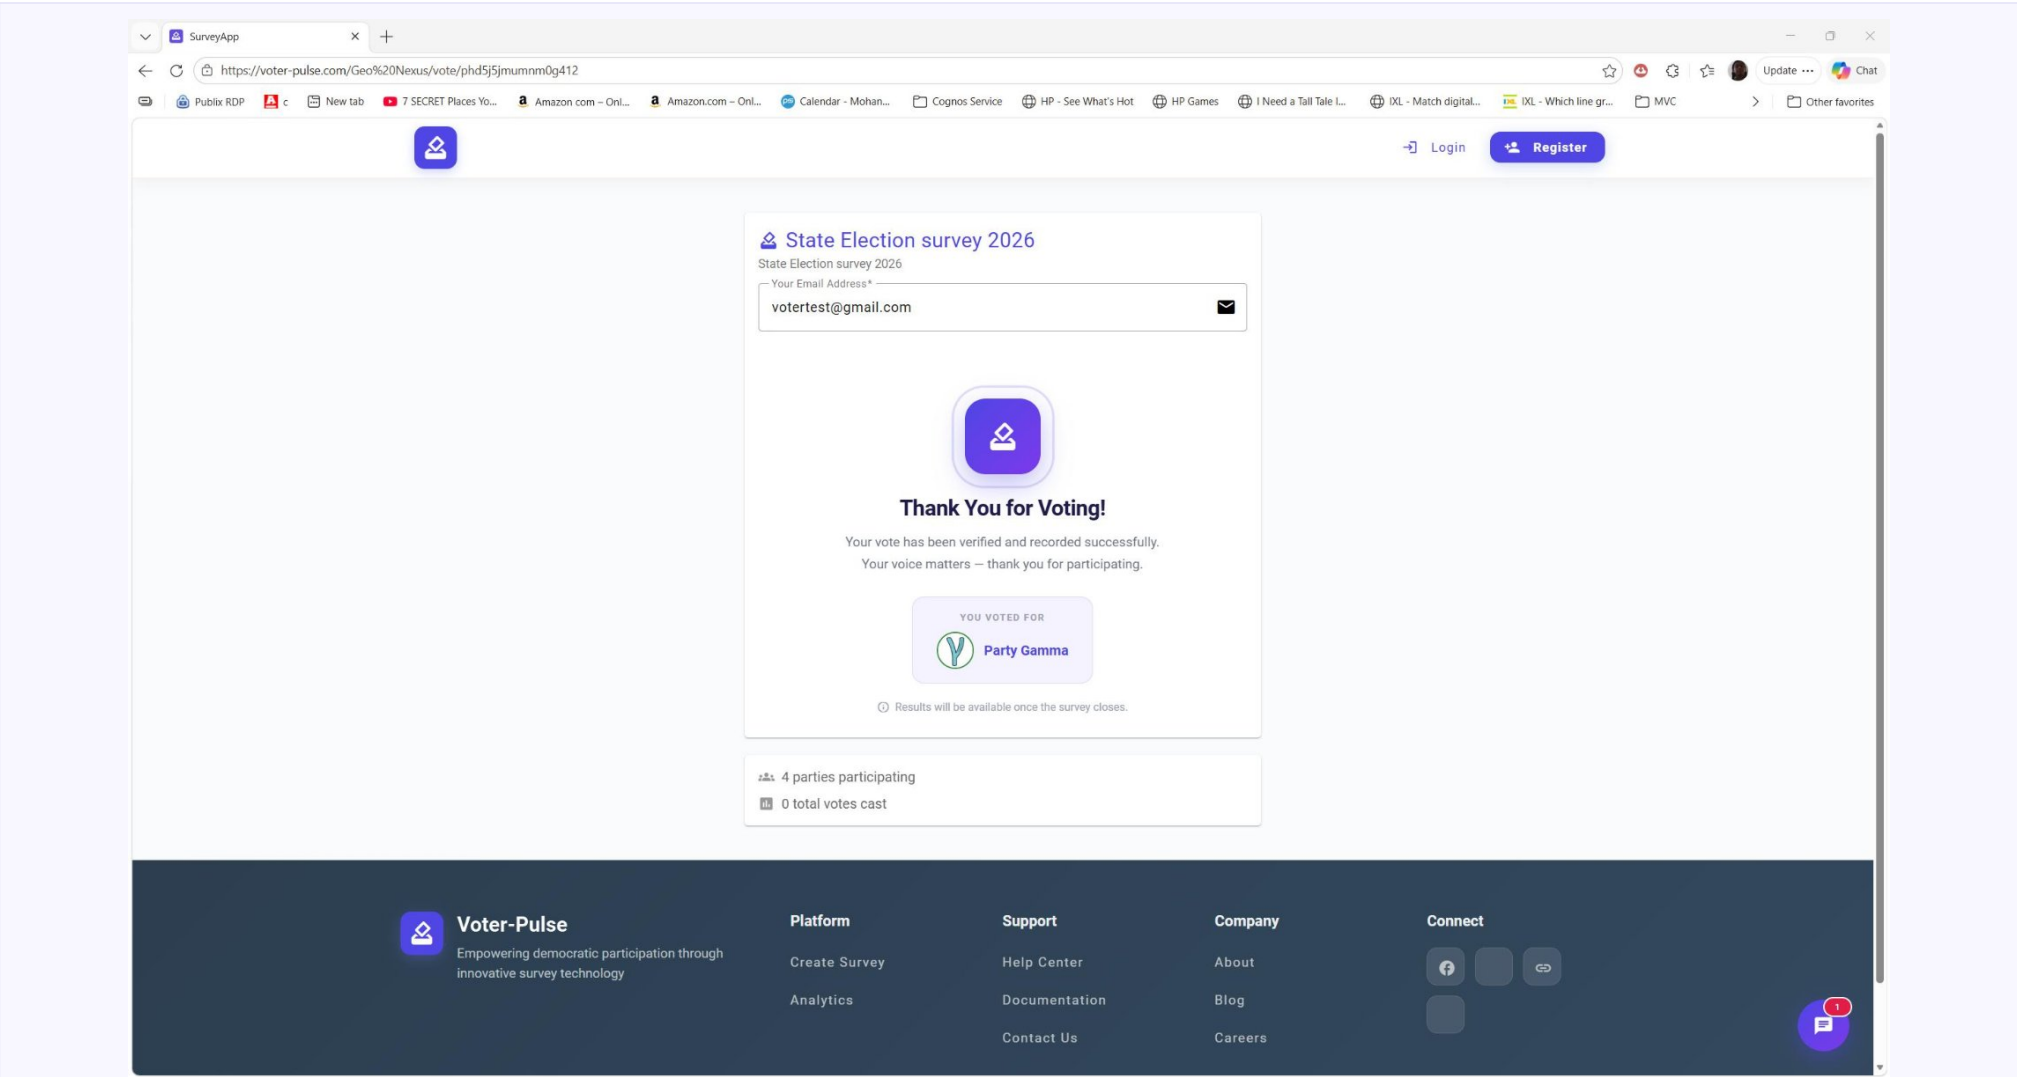

After successful verification, the participant is redirected to a confirmation page.

STEP 4

Vote Confirmed — Thank You Page

On successful OTP verification, the participant lands on the **confirmation page** which displays the voted party, confirms the vote is permanently recorded, and notes that aggregate results will be visible once the survey officially closes.

Each email address may cast exactly ONE vote per survey. Any subsequent attempt using the same email will be automatically rejected by the system.

Thank You for Voting — confirmation page showing the party voted for and successful recording

03

MODULE 3

Vote Management

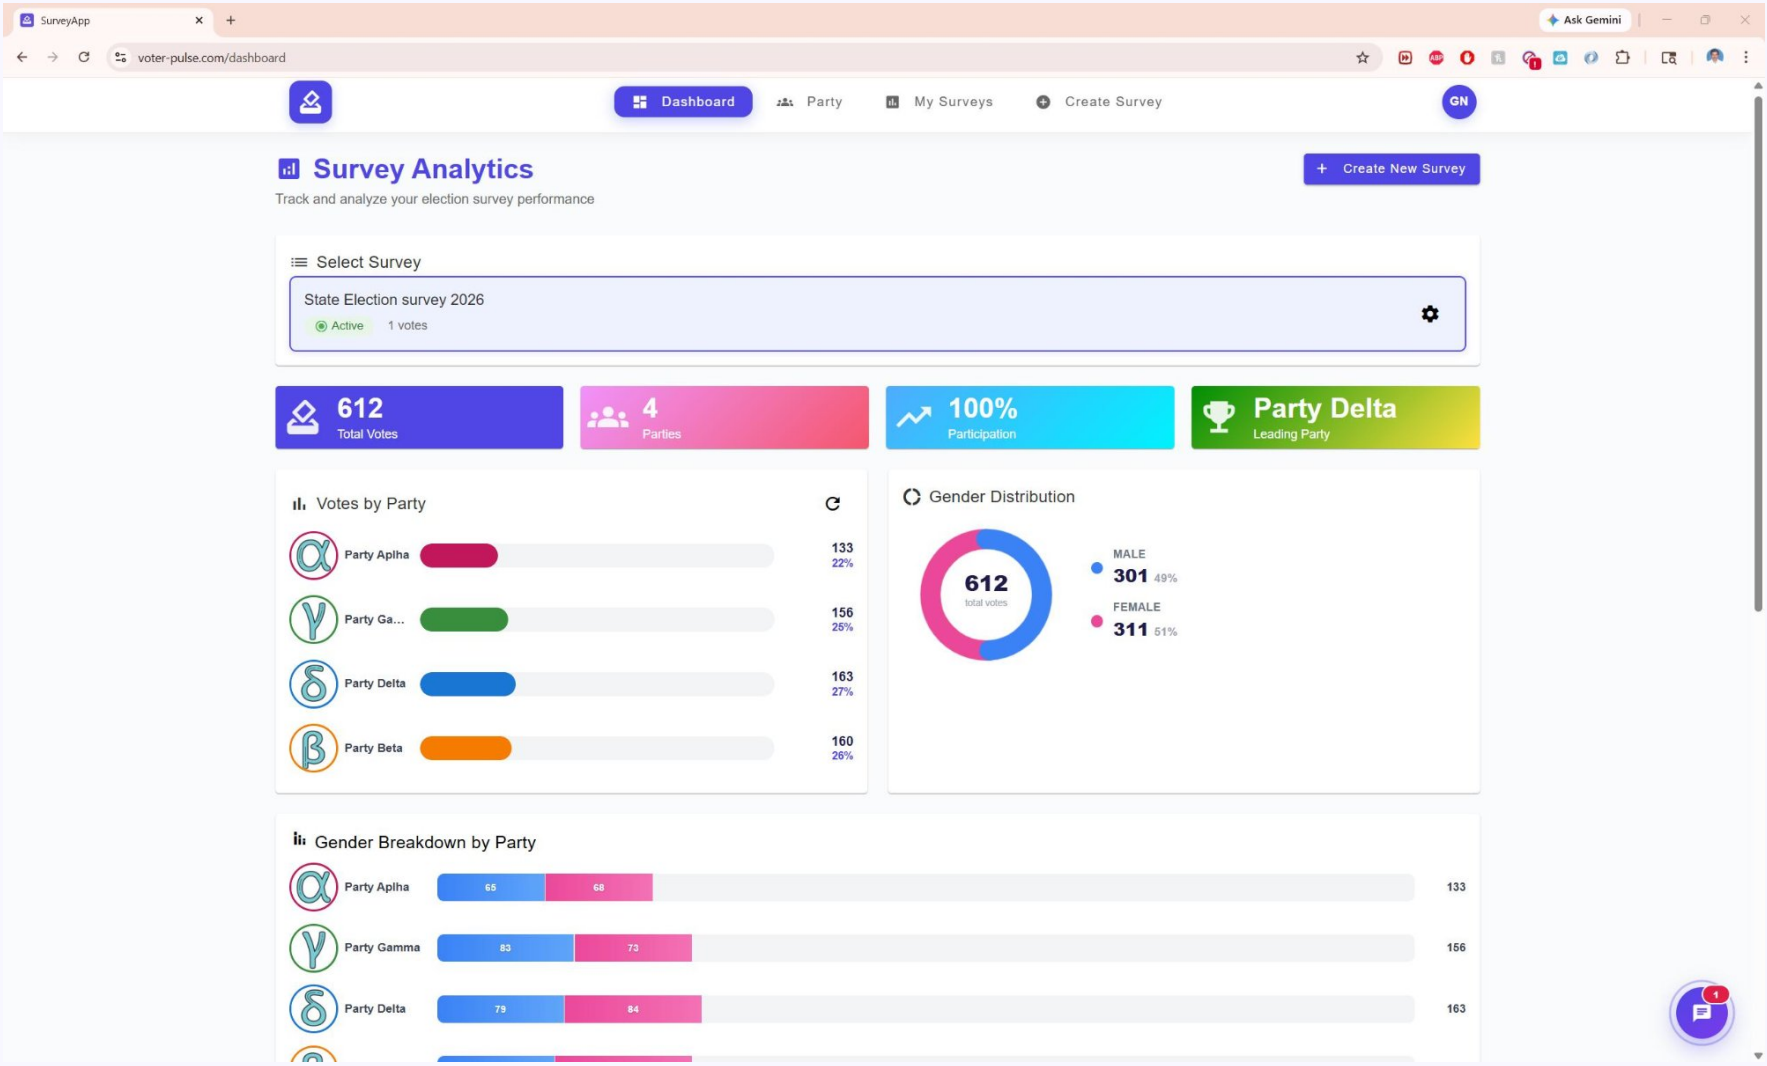

Organisers can monitor live results and demographic breakdowns from the Survey Analytics Dashboard.

STEP 5

Monitor Live Results on the Dashboard

Authenticated organisers access the **Survey Analytics Dashboard** to track results in real time:

- **KPI Cards** — Total votes, number of parties, participation rate, and the leading party.
- **Votes by Party** — Horizontal bar chart with vote counts and percentage share per party.
- **Gender Distribution** — Donut chart showing Male / Female / Other split across all votes.
- **Gender Breakdown by Party** — Stacked bar chart for demographic analysis per party.

Survey Analytics Dashboard — real-time KPI cards, votes by party, gender distribution, and demographic breakdown

Quick Reference Summary

Module	Steps at a Glance	Key Rules & Notes
Party Management	1. Party tab → + Add Party 2. Enter name, leader, colour, logo 3. Save — card appears on Party page 4. Edit or delete at any time	• Private to your account only • Logo: local file, URL, or Google Drive • Colour is reflected in all charts • Deletion may affect published surveys
Survey Management	1. Create Survey → fill details 2. Select ≥ 2 parties 3. Saved as Draft — review carefully 4. Click Publish → confirm OK 5. Copy & share the generated URL	• Draft is fully editable before publish • Settings locked after publishing • Invitation email auto-sent on publish • Deactivate to pause voting temporarily • Close to permanently lock the survey
Vote Management	1. Open survey URL — no login needed 2. Enter email + pick party 3. Submit → receive 6-digit OTP email 4. Enter OTP in dialog → Verify & Submit 5. Thank You page confirms vote	• OTP valid for 5 minutes • One vote per email per survey • Anonymous option hides voter identity • Dashboard shows live real-time results • Gender breakdown available per party
